

1" Test
Square

Instructions

Liners are usually made from MicroFleece, Buttersuede (found at Hancocks Fabrics), Alvoa Suedecloth (found at Jo-Anns), or Mircochamois (found occasionally in a store). Regular Fleece won't work. To test if a fleece works, place an absorbent material underneath the fleece and drip water on it. If the water quickly passes through, it'll work. No sewing is required, but some may prefer the finished look of sewing.

Materials: 1/2 yard of Stay-Dry fabric (14 liners with 60" wide fabric)

1. Cut out a 5" x 15" rectangle of stay dry fabric.
2. (Optional) Serge or zig-zag stitch the edges. (Most stay dry fabrics don't unravel at all)
